

Mission Statement

ASSISTING IN STREAMLINING YOUR PROJECT COST

Strategic Energy Group Inc. can assist your company in streamlining your corporate projections and reducing overall project cost and turnaround time by offering a complete service package from any of our four divisions.

- Petroleum Surface Land Division
- Petroleum Surveying Division
- Buried Line Locating Division
- Municipal Survey Division

Operating our four divisions all within the same office building promotes huge cost savings when you can deal immediately with issues or concerns as to the project without having to set up appointments or meetings between the independent parties involved.

Surveying projects such as wellsites or pipeline revisions are a quick turnaround due to the interlinked divisions striving to achieve the same goal. Having the ability to walk down a hallway and meet with another division makes the project cost effective. Also, with our four divisions under the same roof our overhead costs are drastically reduced with the savings passed along onto our clients.

Sincerely,

Bruce Koss
General Manager of Business and Operations
